companies (NA) Not available.

(D) Withheld to avoid disclosing figures for Individual
(X) Not applicable.

• Represents gross shipments of the mineral indicated by the industry name less from other establishments transferred to other establishments for preparation or less minerals received establishments for preparation.

• Represents direct shipments of iron ore, treated iron ore for consumption, and iron agglomerates in Alabama only. Quantity represents thousands of long tons.

• Figures for cost of minerals received for preparation are included with those for cost of supplies, purchases for resale, and purchased fuels and electric energy.

• Represents crude ore mined.

• Represents thousands of barrels of crude petroleum, field condensate, and drips shipped or used.

• Represents millions of cubic feet of natural gas shipped.

• Represents net shipments of natural gas liquids only.

• Includes figures for minerals produced and used in the same establishment in making manufactured products, except for crushed and broken stone that was used in the mineral industries. The value of such products was estimated.

• See footnote 9. Includes some crushed and broken stone, n.e.c. produced and used in the same establishment in making manufactured products, amounting to less than one percent of the total shown.

• Figures for the value of shipments of primary products by establishments classified in other industries are included with those for the value of shipments of primary products by establishments classified in the specified industry.

• Excludes figures for minerals produced and used in the same establishment.
